1 the group activities were very helpful. i learned a lot from my other peers, so much more that i have a new love for flipped clasrooms.

2 We really had to teach ourselves most things

3 Dr. Larimore's group work was really helpful in solidifying knowledge from the ARQs which helped me retain the information.

1 watching lectures online that simply repeat what was read in the chapter does not offer further guidance on any points of confusion.

While I understand the CWS requirements on some of the assignments, they were ineffective because most of the time my group's work did not get tweaked after the visit (because it didn't need to be) and the online format was very hard to navigate and added stress to those assignments. It was difficult to find a time where all of us in different time zones could meet and navigating how to conduct a group meeting with their format was difficult.

1 The hardest part of this class were the deadlines. Although I didn't have a problem meeting them, I didn't feel challenged just because I've taken a lot of biology courses prior to Agnes.

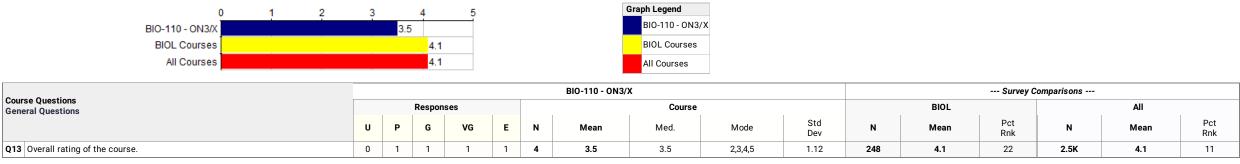

2 Challenging bc I never new wtf was going on.

	1 rubric	s were well written and detailed									
	2 There	were some assignments that could've used additional clarification given the online format: the assignments were meant for in-person instruction and although they transferred well to online, some additional clarification for the online environment is necessary.									

Responses: [U] unsatisfactory=1 [P] poor=2 [G] good=3 [VG] very good=4 [E] excellent=5
